NOTES ON CLOTHING

Because our program environments are characterized by unpredictable weather it can get cold, hot, or rain any time of the year. Our clothing list reflects the importance of the layering principle. Dressing in several light layers rather than one heavy layer allows more flexibility as the weather and workloads change. Wool and synthetics (polypropylene or fleece) retain much of their insulating ability when wet.

We advise you not to bring cotton clothing (except bandannas and underwear). Cotton retains moisture and loses almost all of its insulating properties when wet. And once cotton clothing gets wet, it stays wet.

*We recommend thrift/second hand and/or outdoor clothing stores if you need additional gear, but you **DO NOT** need to spend money on gear, it is not necessary.*
